

ACCEPTABLE COVID 19 SECURE MPV, MINIBUS LAYOUT.

There are two different types of multi person carrier that are currently in service within our mobile teams.

There is an MPV which is a 9-seater and a Minibus which is a 15 or 17-seater. The diagram below is for a 17-seater

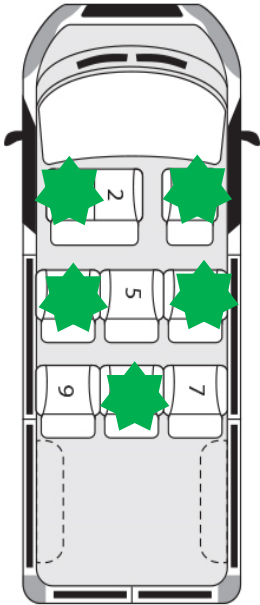

Both have different capacities when it comes to socially distanced travel. The following plan layouts are from dealerships, the Minibus one is slightly different as in we don't have a passenger seat in ours.

MINIBUS.

CAPACITY = 9 STAFF 17 seater, 8 STAFF 15 seater

MPV

CAPACITY = 5 STAFF.

Windows should be opened to allow fresh air to enter the vehicle, all passengers to face forward when travelling
